➤ info@aerocollect.dk / www.aerocollect.dk

HOW TO SHIP AeroCollect® SAMPLES

General remarks for shipping

- The chambers can be shipped using traditional couriers to SAN Group Biotech Germany for analysis. The samples may be shipped under ambient conditions and will remain stable for at least a week.
- An AeroCollect® sample is not classified as a biological sample. It is considered as inactivated environmental sample and as such does not require any special handling procedures.
- To get the AeroCollect® samples analyzed at the SAN Group Biotech Germany laboratory, please always include our standard submission form, stating the sample-matrix as „AeroCollect-chambers“ and ship to the address below

SAN Group Biotech Germany GmbH
Muehlenstraße 13
49685 Hoeltinghausen
Germany

AeroCollect® samples are classified as: „printed circuits with other passive elements“

- **HS Code:** 85340090
- **CN Code:** 85340090
- **TARIC Code:** 8534009000

SHIPPING FROM EU

When shipping AeroCollect® samples from the EU:

- **TARIC Code:** 8534009000

SHIPPING FROM OUTSIDE THE EU

When shipping the AeroCollect® samples from countries outside the EU they need to be accompanied by a proforma invoice, stating the following remark:

- **Procedure Code:** 4000C33 – Destructive testing

Samples should be classified with:

- **HS Code:** 85340090

If you have any further questions regarding laboratory analysis and shipping conditions please don't hesitate to contact us!
